Your Measure T dollars at work at Jose Antonio Vargas Elementary School

Dear Neighbor,
Measure T projects will start soon on the Vargas Elementary School campus near you.

Window installation is planned for May through July 2023. Work is a result of changes in state building codes for schools.

To minimize disruption to the school day, construction will take place in the late afternoons and evenings during the school year and during business hours in the summer.

Additionally, work continues on a **new storage shed** through June to allow proper storage of school items, increasing safety. The area, on the

west side of the field close to the school's car entrance, is fenced off for safety.

This summer, there will be construction on a **roll up door** in Multi-Use Building to allow for better ventilation and flexible seating for students.

Construction will begin on a **campus greening project** this summer, including replacement trees along N. Whisman Rd. and other plantings inside the campus to reduce heat and add shade.

Construction has been scheduled to minimize disruptions for students, staff and neighbors.

Thank you in advance for your patience.
